## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 25 is rejected under 35 U.S.C. 102(b) as being anticipated by Moslehi (US Patent 5270222).

3. Moslehi teaches a data packet containing information related to sheet resistivity measurements transmittable between two or more processes (col. 6 lines 50 – 64).

4. Claim 26 is objected to as being dependent upon a rejected claim but would be allowable if rewritten in independent form.

5. Claims 1, 3 – 20, 22 and 24 are allowable, because prior art does not teach in-situ analysis of sheet resistivity of a layer using a feedback generator to control RTA components.

6. Prior art considered, but not used in the rejection include Moslehi (US Patent 5400209).

### ***Remarks***

Applicant's arguments filed 16 January 2004, with respect to the rejection(s) of claim(s) 25 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of a new reference, which reads on applicant's claim 25.
